

# PMI CHOLANGIOCATH

Disposable Cholangiogram Catheters for Any Approach

PMI's full line of sterile, disposable Cholangiogram Catheters include open, laparoscopic, percutaneous and grasper options to deliver ease of use and enhanced safety features.

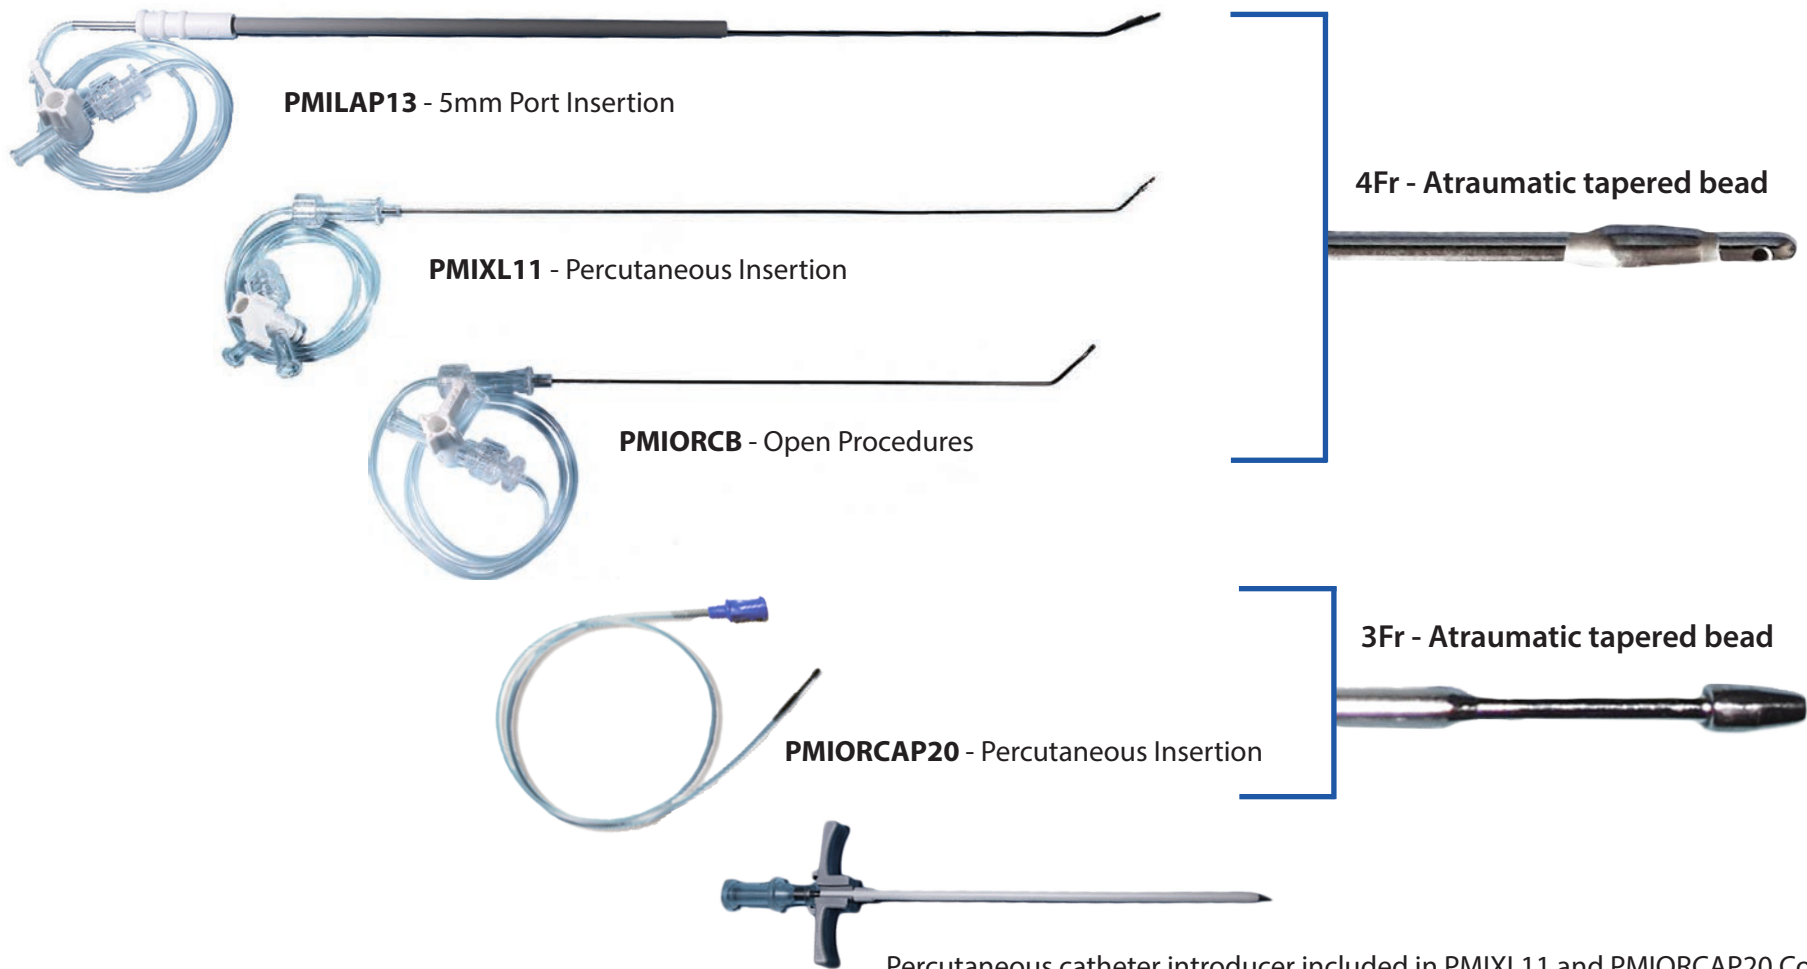

## Product Features:

- Atraumatic tapered bead on catheter tip
- Smooth but rigid tip
- Sterile and disposable to fit all approaches
- Combination Kits for percutaneous approach
- Grasper Approach

## Product Benefits:

- Prevents backing out of cystic duct and reduces the risk of extravasation
- Promotes easy access to the cystic duct, lessened risk of collapsing catheter during clamping
- Ease of use, enhanced safety and standardization
- Catheter and introducer included, no need to add additional supplies
- Offers a faster and easier method of cholangiograms without the need for ductotomy

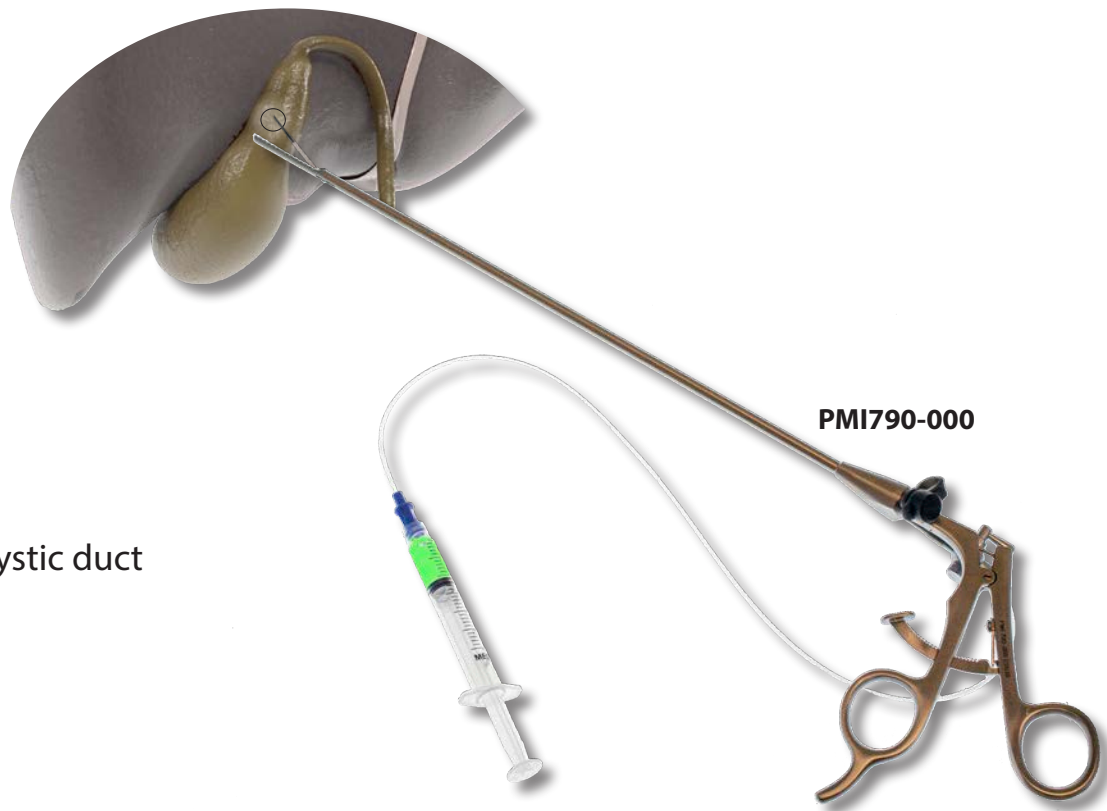

(See back page for ordering information)

# A simpler, faster way of doing a cholangiogram without a ductotomy!

## The PMI Cholangiogram Grasper and ORCA Catheter

- Reusable 5mm instrument, available in standard and bariatric lengths
- Fastest method for performing cholangiogram, saving valuable OR time
- **Eliminates the need for a cystic ductotomy**
- Offers versatility by functioning as a grasper, cholangiogram instrument and aspirator
- Provides atraumatic traction during dissection of the cystic duct
- Vent with channel valve allows for maintenance of pneumoperitoneum, aspiration and smoke ventilation

**PMI790-000**  
**PMI Cholangiogram Grasper**  
w/Atraumatic Traction
